## Castrol magnetec 5w40 a3/ b4 pdf

5W-30 DX 5W-40 A3/B4 Castrol Magnet 5W-40 A3/B4 Specifications/Industry Standard ACEA A3/B4 API SN MB Approved 226.5/229.3 Renault RN0700RN/071 VW 502 00/50 C3 Max 5W-40 C3 Specifications/Industry Standard ACEA C3 API SN Satisfied: Fiat 9.55535-S2 BMW Longlife-04 MB approved 229.31 Renault RN 0700 / RN 0710 oil house car and engine engine chemical number 9900000000 as much as 75% of engine wear occurs while engine heating occurs. When the engine stops, the oil flows out of the key engine parts, which makes the Castrol Magnet 5W-40 now over! The intelligent molecules in this synthetic engine oil fully attach to your engine and are an additional protective layer, so your engine is protected against mod wear from the moment it begins. It also means you spend less money on fuel and expensive damage. For example, when you queue, it will require an engine when you stop and start frequently, it's struggling both on the engine and using a lot of fuel. Features: Using full synthetic technology provides protection during and after heat adhesive to the counter metal surface, wear on the engine part, providing outstanding performance in very cold start conditions, engine oil can be used for gasoline and diesel engines throughout the year. What kind of oil should you choose? We recommend that you look in your car manual to see which engine oil and viscosity the car manufacturer recommends your car precisely. You can use engine oil on your car through our increased vehicle registration number. Specifications: Castrol Magnet 5W/40 (A3/B3/B4) 4 L Item No. 9900004640 Engine oil type 4-liter viscosity SAE 5W-40 MB approval 2293 MB approval 2265 BMW Longlife-4 Approval VW 505 00 Approval ACEA A3 / B3 ACEA Approval A 3/ B4 approval RN0710 Approval RN0700 VW 502 00 API SN approval API approval CF front car oil and chemical engine oil no. 99000004641 Get immediate engine protection! Up to 75% of engine wear occurs while the engine heats up. When the engine stops, the oil flows out of the key engine parts, which makes the Castrol Magnet 5W-40 now over! The intelligent molecules in this synthetic engine oil fully attach to your engine and are an additional protective layer, so your engine is protected against mod wear from the moment it begins. It also means you spend less money on fuel and expensive damage. For example, when you queue, it will require an engine when you stop and start frequently, it's struggling both on the engine and using a lot of fuel. Features: The use of full synthetic technology provides protection during and after heat glue to the metal surface. counter-wear in the engine part provides outstanding performance under very cold start conditions, engine oil can be used for It provides good protection of the engine during the cold start and summer months. What kind of oil should you choose? We recommend that you look in your car manual to see which engine oil and viscosity the car manufacturer recommends your car precisely. You can use engine oil on your car through our increased vehicle registration number.
